

Bienvenido a Slicer

Dra. Sonia Pujol
Profesora adjunta de radiología
Hospital de mujeres de Brigham
Facultad de Medicina de
Harvard

Objetivo

Este tutorial es una pequeña introducción al módulo de Bienvenida del software de código abierto Slicer

Conceptos básicos de Slicer 5.6.2

- Slicer es un software libre para segmentación, registro y visualización de información de imágenes médicas
- La plataforma se desarrolla a través de un esfuerzo multi-institucional de varios consorcios a gran escala financiados por la institución National Institutes of Health (NIH)
- Slicer es sólo para la investigación médica, y no está aprobado por la FDA.

Conceptos básicos de Slicer 5.6.2

3D Slicer versión 5.6.2 incluye 130 módulos y 74 extensiones para la segmentación de imágenes, el registro y la visualización 3D de datos de imágenes médicas.

Plataformas compatibles

- Slicer es un software multiplataforma desarrollado y con mantenimiento en Mac OSX, Linux y Windows.
- Slicer requiere un mínimo de 2 GB de RAM y un acelerador gráfico dedicado con 64 MB en memoria gráfica integrada.

3D Slicer versión 5.6.2

Bienvenido a Slicer

Cada módulo incluye una serie de pestañas, las cuales dan acceso a diferentes funciones

Dar clic al símbolo de la flecha para mostrar el contenido de cada pestaña

Interfaz de usuario de Slicer

Barra de herramientas

Panel de interfaz de usuario (UI) del módulo de bienvenida Slicer

Visor 3D

Explorador de datos

Visores anatómicos 2D

Introduction: Slicer Tutorials

- This page contains "How to" tutorials with matched sample
- For "reference manual" style documentation, please see the
- For questions related to 3D Slicer training materials and to of 3D Slicer.
- Some of these tutorials are based on older releases of 3D in updated versions. For tutorials for older versions of Slic

Contents [hide]

1 Introduction: Slicer Tutorials

2 Quick Start Guide

2.1 Downloading and Installing Slicer

3 General Introduction

3.1 Slicer Welcome Tutorial

3.2 Slicer4Minute Tutorial

4 3D Visualization

4.1 Data Loading and 3D Visualization

4.2 DICOM

4.3 Open Anatomy Browser

Nightly 4.10 4.8 4.6 4.5 4.4 4.3 4.2 4.1 4.0 3.6 3.5 3.4 3.2 ALL VERSIONS

Where to start ?

- Getting started
- Quick overview about Slicer
- Training pages
- Information on how to use Slicer Nightly
- FAQ
- Set of common questions/answers
- Discussion Forum
- The most effective way to get help from the community

How to

- Report a problem / Create a feature request

Slicer Application

- Installation / Uninstallation
- Main Application User-Interface
- Application Settings
- Extensions Manager
- Mouse Buttons, "Hot-keys" and Keyboard Shortcuts

Welcome to Slicer

- Modules by category
- Modules by name
- Modules by contributing organization
- Modules by contributing individual
- Modules by type
- Modules by extension
- Extensions by category
- Extensions by name
- Extensions by contributing organization
- Extensions by contributing individual

Developers Corner

- Information for Software Developers
- Source code, contribute patch, develop modules

Miscellaneous

- Documentation guidelines
- Slicer user documentation principle and guidelines
- Visual blog
- Set of screenshots showing Slicer in action.
- Release Notes
- Platform specific issues and considerations
- Announcements & Acknowledgments
- Registration Library
- Real-life example cases of using the Slicer registration tools, incl. datasets and step-by-step instructions to follow and try yourself.

Documentation in other languages
